

we're  
committed to  
100% renewable  
electricity

This is to certify that

is being powered by 100% certified renewable  
electricity from Good Energy

All of Good Energy's electricity is 100% REGO backed from local  
natural sources such as sun, wind and water.

Good Energy works closely with its community of over  
1400 independent generators across the UK to ensure the power  
it provides is as clean and green as possible.

In line with World Resource Institute GHG Protocol, carbon  
emissions associated with this power can be counted as zero in  
any voluntary reporting.

Good Energy is audited by SGS UK under these terms.
